What if every single act of design and construction made the world a better place?

AN INTRODUCTION TO THE LIVING BUILDING CHALLENGE™

LEARNING OBJECTIVES
1. Understand the basic philosophy of the Living Building Challenge
2. Describe the key components of the program
3. Discuss the rationale for restorative design principles
4. Identify and locate the resources provided by the International Living Future Institute for deeper engagement

PRESENTED BY VOLUNTEER PRESENTER: Leslie Jonsson, Associate, CDi+Mazzetti

DATE: March 10, 2015
TIME: Evening
LOCATION: Richland, Washington

Approved for 1 AIA Learning Unit under either Health, Safety and Welfare (HSW) or Sustainable Design

The Living Building Challenge Ambassador Network facilitates in-person introductory presentations about Living Building Challenge around the world. It also fosters opportunities for ongoing dialogue about restorative principles in design, construction and building operation through the creation of local Living Building Challenge Collaboratives.

To learn more and get involved, visit the Living Building Challenge website or speak with your local Volunteer Presenter.

Envision a future that is socially just, culturally rich and ecologically restorative.™

Living Building Challenge™ is a philosophy, advocacy tool and certification program that addresses development at all scales. It is comprised of seven performance areas: Site, Water, Energy, Health, Materials, Equity and Beauty.

At the International Living Future Institute, we believe that providing a compelling vision for the future is a fundamental requirement of reconciling humanity's relationship with the natural world.
